PROFESSIONAL SUMMARY

Passionate graduate and Front-End Engineer proficient in Javascript, Typescript, React, Next.js, Tailwind CSS, Sentry, Clerk, Stripe Connect, tRPC, MongoDB, GSAP, Inngest, Payload CMS, Convex, CodeMirror 6, Web Containers and Vercel, with Udemy Full Stack certification and HSBC Women in Tech training, previously contributed as Research Associate (awarded Top Market Research Associate) at MOXO for 10 months and currently on a Career break, eager to return as an entry-level developer to build innovative web solutions.

WORK EXPERIENCE & KEY ACHIEVEMENTS

Full-Stack Development Upskilling & Carrer Transition | 8thJan 2026 – Present

- Dedicated full-time to advanced technical training & building a production-ready porfolio using React, Next.js, Typescript
- Engineering scalable web applications & refining frontend architecture skills
- Actively contributing to Github & staying current with Industry best practices in full-stack development.

Market Research Analyst– MOXO, Bangalore | Feb 2025 – Jan 2026

- Built and Delivered 8000+ high-quality buyer personas for enterprises across 7+ industries achieving the highest accuracy and adoption rate among all researchers at Moxo.
- Recognized as #1 Market Researcher Company-wide at Moxo for Outstanding performance and Contributions.
- Received Special Acknowledgement from leadership and peer Director for Dedication and Result.
- Conducted in-depth market Research across Multiple Industry verticals to qualify prospective clients and provide strategic insights for business growth Collaborated with Sales and marketing team to optimise lead generation through CRM management (Hubspot) and data driven recommendations

Key Projects – Solved at Moxo

1. **High-Accuracy and Decision-making**
   Built and delivered high-quality B2B lead lists (8,000+ contacts) using LinkedIn Sales Navigator, ZoomInfo, Contactout, and Apollo, achieving 90–95% accuracy in decision-maker titles and contact details.
2. **Ideal Customer Profile (ICP) Development & Lead Qualification**
   Consistently generated 300-400 qualifies leads per week & identified & qualified ideal customer profiles for Saas, IT Services, Digital Marketing, Wealth Management, financial Services, Legal Accounting, Cloud Solutions, and digital transformation offerings, resulting in 3-5x higher response rates compared to generic lead lists.
   Delivered end-to-end B2B lead generation: research → ICP → decision-makers → qualified lists, filling pipelines 3–5× faster and Slashed cost-per-lead 50–70%, replaced bad vendors, and directly drove higher conversions and revenue.

TECHNICAL SKILLS: Frontend & UI

Languages: **Javascript(ES6+), Typescript**
Libraries & Frameworks: **React, Next.js, GSAP(Animations)**
Styling: **Tailwind CSS, Responsive Design**
Specialized UI: **CodeMirror 6 (Text Editors), WebContainers(Browser-based Environments)**

TECHNICAL SKILLS: Backend & API

Frameworks & Logic: **tRPC (Type-safe APIs), Inngest(Serverless Workflows/Queues)**
Authentication: **Clerk**
Content Management: **Payload CMS**
Payments: **Stripe Connect**
Databases & Storage: **MongoDB, Convex**
MONITORING, AI & Automation: **Sentry, CodeRabbit, Junie**
Version Control: **Git, GitHub**
SOFT SKILLS: **Communication**
CS Fundamentals: DSA, DBMS, Operating System, OOP Concepts, Computer Networks
Solved 150+ Leetcode Problems in Javascript Covering Dynamic programming, Graph theory & Array manipulation.

PROJECTS

Polaris | Build a Complete Browser-native Own AI Powered coding Environment IDE platform **March 2026**

Next.js, Typescript, Convex, Clerk, Inngest, CodeMirror 6, WebContainers, Firecrawl, Sentry, CodeRabbit

https://github.com/Spandana-N-S/polaris

- **AI-Driven Development Agent in Real-Time Browser Execution:** Build an autonomous AI agent powered by Inngest that creates, modifies files, scrapes URLs via Firecrawl, and executes code entirely from natural-language prompts. Integrated WebContainers to deliver a full Node.js runtime, terminal, live preview, and code execution directly in the browser - zero local setup required. Used CodeMirror 6 with Ghost-text AI Suggestions, syntax highlighting, file explorer, resizable split panes, and selection-based editing. Used Convex for real-time data sync Engine.
- **Seamless Github Integration:** Implemented full repo import/export with Clerk OAuth, background jobs via Inngest, real -time status tracking, and AI-powered pull-request reviews using CodeRabbit.
- **Production-Grade Reliability & Monitoring with End-to-End Modern Workflow:** Added Clerk for Authentication & billing, Sentry for error tracking + AI token/cost monitoring, & structured logging for every user interaction & background job. Delivered a complete professional IDE with project creation dialog, conversation system, 13+ AI tools, optimistic UI updates, & one-click vercel deployment - replicating how modern AI coding tools work.

Multitenant E-Commerce Marketplace App | Build a Complete Production ready App from Scratch **March 2026**

Next.js, Typescript, Tailwind CSS V4, Payload CMS, MongoDB, Stripe Connect, tRPC, Bun/NPM, CodeRabbit

Multitenant E-Commerce Marketplace App | Build a Complete Production ready App from Scratch

- **Multi-Tenant Architecture & Backend:** Designed a robust multi-tenant system with Isolated tenant data, custom subdomain routing(wildcard subdomains), tenant-specific roles, & a powerful payload CMS backend with custom collections, procedures, and strict access control for products, categories, orders, reviews and media.
- **Advanced Product Catalog & User Experience:** Created a rich shopping experience featuring category/subcategory navigation with breadcrumbs, real-time search & filters, tags, sorting, infinite scroll with loading skeletons, responsive product cards, and a complete product detail page.
- **Payments, Orders & Production Features:** Integrated Stripe Connect for multi-vendor, payments with platform fees, tenant verification, webhooks, & secure checkout. Added full cart manangement(Zustand), order creation, user library for purchased content, review system, private per-tenant media storage, and deployed on vercel with proper subdomain middleware and cookie handling.

Hangman Game | Fully Interactive Browser - based word guessing game | Built with Vanilla Javascript **February 2026**

Vanilla Javascript, HTML, CSS

https://github.com/Spandana-N-S/hangman-Javascript

- **Game Logic & Mechanics:** Developed core game engine with random word selection from 260+ word list, hint system, letter guessing, win/loose detection, and progressive hangman stages (max 6 incorrect guesses).
- **Interactive UI & Controls:** Created dynamic on-screen keyboard with click events, real-time word display, guessed letter highlighting, guess counter, & animated game-over modal showing victory/loss with correct word & Play Again button.
- **Polished Design & Responsiveness:** Designed clean, modern UI using flexbox, Google Fonts, smooth animations, hover effects, and fully responsive layout for optimal experience across devices.

EDUCATION

BCA, Computer Science CGPA 7.57–Bangalore University, GFGC, Bangalore (2021-24)

CEBA, Computer Science, ST.Anthony's PU College, Bangalore (2020-21)

WORKSHOPS AND WEBINARS

Consitently Attending Webinars and Workshops from different Platforms i.e Linkedin

CERTIFICATIONS

- **Complete Full Stack Web Development Completion Certficate – Codecraft Academy | Udemy (2026)**
- **Women In Tech Programme Course Completion Certificate in Web Mobile Applications – Nirmaan Organization | Supported by HSBC (2023-24)**
- **Career Essentials in Github Professional Certificate – LikedIn Learning (2024)**
- **Project Management Job Simulation Completion Certificate – Forage (2024)**

LANGUAGES

English(Fluent), Kannada(Native), Hindi(Proficient in Reading and writing; Conversational in Speaking)
